METHODS, SYSTEMS, AND COMPUTER PROGRAM PRODUCTS FOR DYNAMIC INTER-OPERABILITY OF NODES IN SERVICE GRIDS

ABSTRACT

5   A requesting service node message can be transmitted from a requesting service node in a service grid directed to a destination service node in the service grid, the requesting service node message having a requesting service node message format associated with a version of the requesting service node. The requesting service node message can be received at an inter-operability service in the requesting service node

10   message format. A destination service node message format can be determined for the requesting service node message based on a version of the destination service node. Related systems and computer program products are also disclosed.
